New Features in Vault V14 API (13.5.3 Release)

Release Date: January 22, 2016

We are pleased to bring you the following enhancements to the V14 API in this week's release. Refer to the Vault Release Notes for additional information about the 13.5.3 release. See the Vault Developer Portal for API documentation.

Bulk Delete Object Records

In this release, we've expanded our Bulk Object Records API to include bulk delete. In addition to creating and updating object records in bulk, users can now delete from 1-500 object records in a single request.

Submissions Import Metadata Mapping

In this release, we have added a new API to enable mapping of eCTD submission XML metadata to objects records within a RIM SubmissionArchive vault.

Notable API Fixes

Issue	Issue No.
API users who request a viewable rendition of a document see the wrong file name in the response header.	DEV-88815

💬 Feedback

Group API queries which include invalid IDs receive a non-descriptive error message.	DEV-80863
Users are unable to create groups containing inactive users.	DEV-79524
