New Features in Vault V8.0 API (7.5.3 Release)

Release Date: January 24, 2014

We are pleased to bring you the following enhancements to the V8.0 API in this week's release.

Search Across Document Versions

The VQL is now capable of searching across document versions. With this new feature, it is possible to:

- Search within all versions of the document
- Search within all versions of the document while filtering for the latest version of the document that satisfies a certain search criteria, even if it is not the latest version
- Search within all versions of the document while filtering by the steady state versions of the document, regardless if the steady state version is the latest or not

Learn more.

Boolean Operators in Text Search

The FIND operator in VQL is now capable of accepting complex search phrases containing boolean operators. Learn more.
